OUR EXPERT

衰老与细胞的关系 Aging and Cells

对于人类而言，衰老本身是最大的退行性疾病，会导致我们的身体失去修复“疾病”和“受伤”的能力。环境的污染，以及生病，吸烟，缺乏锻炼，营养不良和精神抑郁等都会使毒素和致癌物聚集在我们的体内，这会取代我们的细胞数量，并极大地降低我们的细胞功能和寿命。

For humans, aging is the largest degenerative disease that can cause our bodies to lose their ability to repair "illness" and "injury." Environmental pollution, as well as illness, smoking, lack of exercise, malnutrition and mental depression will cause toxins and carcinogens to accumulate in our bodies, which will replace our cell number and greatly reduce our cell function and lifespan.

我们在20岁后，骨髓生成的健康干细胞含量渐进减少，这意味着体内本有的自然再生能力就会开始渐向衰退。

After 20 years old, the content of healthy stem cells of human body gradually decreases, which means that the natural regeneration ability inherent in the body will gradually decline.

如果您追求长寿与健康，最安全，最根本的方法，就是逆转干细胞年龄，从而让身体年龄变得年轻。这是一种伴随身体自然循环的疗法，由内刺激体内衰老细胞，增加体内干细胞的数量，以年轻的新细胞修复，再生身体，从而实现个性化和最佳的健康状态，创造更健康的体魄，而不是传统意义上的疾病医疗。

If you are pursuing longevity and health, the safest and most fundamental way is to reverse the age of the stem cells and make your body younger. This is a therapy that accompanies the natural circulation of the body. It stimulates senescent cells in the body, increases the number of stem cells in the body, repairs and regenerates the body with young new cells, thereby achieving personalized and optimal health, and creating healthier Physical rather than traditional medical treatment of diseases.

传统医学是采用干涉、抑制、去除、替换、破坏、加剧的途径与方法去治疗疾病，这有极大的限制性与不可预见性。

Traditional medicine uses interventions, inhibitions, removals, replacements, destructions, and exacerbations to treat diseases, which is extremely restrictive and unpredictable.

而使用干细胞的预见性途径是通过再生细胞、更新细胞、修复细胞、激活细胞、逆转细胞损伤、补救细胞结构的方法来从根本上解决问题。

The predictive approach using stem cells is to fundamentally solve the problem by regenerating cells, renewing cells, repairing cells, activating cells, reversing cell damage, and remedying cell structure.

专业认证 Qualifications

颐丰健康的再生医疗产品中，采用独家“端粒延长疗法”。该疗法已获得国际最高级别医疗科学权威认可，确保用户的治疗安全无忧，效果显著。

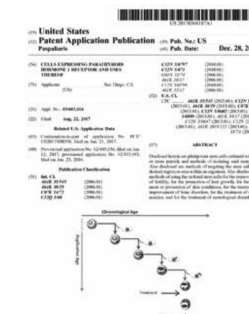

One of Caresfield Wellness regenerative medical products, using the exclusive “telomere extension treatment”. The treatment has been recognized by the highest level of international medical science authority, to ensure the clients' treatment is safe and effective.

什么是端粒？端粒是一个在 DNA 末端，起着保护作用的“帽子”，防止染色体受到破坏。每当细胞复制时，端粒都会变得短一点，但是 DNA 却能保持其完整性。但是，最终端粒在变得无法更短后，就会触发DNA损伤与其他因素一起导致衰老进展，增加癌症发生风险。所以，**人体的寿命和健康状况在很大程度上取决于端粒的长度。**

Telomeres are the caps at the end of each strand of DNA that protect our chromosomes, like the plastic tips at the end of shoelaces. Telomere shortening is involved in all aspects of the aging process on a cellular level. Telomere length represents our biological age as opposed to our chronological age.

定制保健品 Customized Health Supplements

长久以来，用户往往是通过求助朋友或咨询电商客服来获得答案，导致的结果是腿疼买钙片、睡眠不好买南非醉茄、肠胃不好买益生菌、皮肤不好买Ve、肝脏不好保肝药，容易造成盲目跟风吃却无法有明显效果的结果。在没有明确自己是否缺乏维生素、到底缺乏哪种维生素的前提下就盲目的补充维生素显然是不可取的。我们崇尚进行个体的精准营养干预。

The drugstore vitamin aisle can be a super-overwhelming place. From giant, chalky pills to brightly colored gummies that taste like candy, vitamins come in so many forms and formulations that it can feel impossible to know which ones are best for you-or if you would even benefit from swallowing them.

颐丰健康通过用户健康检测结果，我们的药剂师以用户的个人营养需求为中心，根据用户的年龄、性别、饮食方式、生活环境、病史、锻炼水平等，个性化定制最适合个体的营养素补给品。

As schedules become more demanding and health literacy grows more sophisticated, consumers are increasingly expecting consumer health delivery formats and positionings that specifically address their unique lifestyle needs.

Our team of doctors and pharmacists asses your health quiz and lab work in real-time, and use research from top clinical trials to create your unique vitamin.
